PERSONAL

Full-Stack Web Developer with 5+ years building real-time web and desktop apps. Strong in React + TypeScript on the front end and some knowledge of .NET / Node.js microservices on the back end, with recent work on AI agent services (LangGraph, RAG) and Python. Comfortable across the full delivery lifecycle and in both team and independent development.

LANGUAGES

- .NET / C#
- PYTHON / LANGGRAPH
- DOCKER / POSTGRESQL
- SIGNALR / WEBRTC
- REST / GRAPHQL
- MONGODB / FIREBASE
- GIT

WORK EXPERIENCE

Web Developer (Epic5)

8 months / Jan 2026 – Aug 2026 / Riga, Latvia • Remote

Built micro-frontend apps (chat, contacts, org structure, AI assistant) in React 18 + TypeScript as self-contained Web Components. Delivered as web and Electron desktop, with real-time audio/video (LiveKit), messaging (SignalR), and offline-first sync (RxDB). Also built .NET 9 microservices (gRPC, RabbitMQ) and a Python AI service (LangGraph, RAG/pgvector).

Web Developer (HotCode)

1.5 years / Jul 2024 – Dec 2025 / Remote

Built component-driven front-ends in React + TypeScript (MobX, Material UI) for an AI chat, a contacts manager and a collaborative spreadsheet. Shipped as web and Electron desktop, with real-time updates via SignalR and a virtualized grid for large datasets. Flagged Firebase GDPR gaps that drove the team's move to a self-hosted stack.

Full-Stack Developer (Sia Reltek • Freelance)

3.5+ yrs / Aug 2021 – Apr 2025 / Riga, Latvia • Hybrid

Delivered end-to-end web projects for retail, manufacturing and service clients — custom e-commerce, CMS-driven sites and conversion-focused landing pages. Built stores with PHP/MySQL and Shopify Liquid, multilingual (LV/EN) catalogs with custom admin panels, and payment/API integrations (EveryPay).

Programmer Trainee (Mintos)

8 months / Jan – May 2019 / Riga, Latvia • On-site

Delivered investment calculator UI in Vue.js, HTML/CSS/JS, performance tuning (Lighthouse) and AWS.
